DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 69-80, 87-99, 104-144 and 146, are drawn to feature extraction, classified in class 382, subclass 190.
- II. Claims 21-53, 142, 143 and 145, are drawn to image coding, classified in class 382, subclass 232.
- III. Claims 54-68, 142, 143, are drawn to template matching, classified in class 382, subclass 209.
- IV. Claims 81-86, 100-103 and 147, are drawn to image transformation, classified in class 382, subclass 276.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as generating complex coefficients for data characterization. In the instant case, invention III has a separate utility such as determining the matching features of two images. In the instant case, invention IV has a separate utility such as removing affine transformation distortions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
